I.14 Sovereign Credit Rating

Kenya was assigned a B sovereign credit rating by Standard & Poor's (S&P) and Fitch in 2006, and 2007, respectively. It was assigned a B+, equivalent of BI rating by Moody's in 2012, which was the only rating agency to upgrade Kenya's sovereign rating to B2 in 2018. S&P did cut Kenya's ratings outlook from stable to negative. While Fitch credited Kenya at B with a negative outlook and B3 with a negative outlook by Moody's (Annex I). The variations in the credit rating scores of the three agencies shows the influence of subjectivity and the perceptions generated in the qualitative analysis.

In order for Kenya to graduate to investment grade (BBB-) and attract cheaper debt from global markets, there is need for: actualizing the long planned fiscal consolidation; improvement of export sector performance and expand foreign reserves accumulation; promotion of economic growth to boost GDP per Capita; and improve on food production, access and affordability in order to lower and stabilize the Consumer Price Index (CPI) and Real Effective Exchange Rate (REER), among others.
